CRIMINALITA' ORGANIZZATA, CORRUZIONE, APPALTI PUBBLICI Una analisi, storica, scientifica ed etica nel contesto della crisi globale-Augusto Leggio 2015-04-12 Il libro tratta a livello globale, europeo e nazionale le distorsioni della corruzione e della criminalità organizzata, con particolare riguardo al settore degli appalti pubblici; esamina il contesto in cui esse hanno potuto svilupparsi approfittando di falle della globalizzazione economica e finanziaria non adeguatamente valutate e contrastate dalle autorità competenti; approfondisce i processi di inquinamento che l'economia criminale compie sull'economia legale; narra la storia delle mafie nostrane, i loro legami internazionali e le loro tendenze evolutive; cita le principali tipologie di criminalità informatica, bancaria e finanziaria, analizza i nuovi modelli adottati dall'associazionismo criminale moderno e l'uso distorto dell'ICT anche a fini di spionaggio politico, industriale e sociale; espone l'involuzione della guerra che, tramite l'uso di droni, diviene una vera e propria caccia all'uomo; individua le strategie di contrasto al rafforzamento del crimine.

Istituzioni di diritto pubblico-Gian Piero Iaricci 2014-07 Questo lavoro è destinato essenzialmente agli studenti e costituisce un esaustivo strumento di apprendimento della materia pubblicistica. La prima parte è dedicata al diritto costituzionale; la seconda parte al diritto amministrativo sostanziale e processuale, con puntuali riferimenti ad istituti che assumono comunque rilevanza anche nell’ambito del diritto pubblico, nonché al diritto sanitario. I mirati cenni storici consentono una migliore comprensione della normativa vigente. Inoltre, i diffusi riferimenti bibliografici ed il richiamo delle più significative pronunce della Corte costituzionale e delle magistrature superiori hanno lo scopo di agevolare l’approfondimento degli argomenti trattati. Il volume, pertanto, fornisce una solida base sulla quale misurare le annunciate riforme che dovrebbero incidere profondamente, specie sul nostro sistema costituzionale.

The One Minute Manager Builds High Performing Teams-Ken Blanchard 2009-03-24 Newly updated and backed by decades of research, this classic guide will equip leaders and team members alike to unleash the power of teamwork. Never before in the history of the workplace has the concept of teamwork been more important to the functioning of successful organizations. Ken Blanchard, bestselling coauthor of Raving Fans, The One Minute Manager® and Gung Ho!, teams up with Donald Carew and Eunice Parisi-Carew to explain how all groups move through four stages of development on their way to becoming high performing teams—orientation, dissatisfaction, integration and production. The authors then show how a manager can help any group become effective quickly and with a minimum of stress.

Things That Can and Cannot Be Said-Arundhati Roy 2016 In the winter of 2014, Arundhati Roy and actor John Cusack met Edward Snowden and Daniel Ellsberg, the Snowden of the 1960s. Their conversations touched on some of the great themes of our times Ð the nature of the state, surveillance in an era of perpetual war, and the meaning of patriotism

Rethinking Our Centralized Monetary System-Lewis D. Solomon 1996 Examines systems of local currency to promote a political economy based on empowerment, self-reliance, and ecological permanence, and lays out the business and practical aspects of each.

Who Killed Change?-Ken Blanchard 2009 Every day organizations around the world launch change initiatives designed to improve the status quo. Yet 50 to 70 percent of these change efforts fail. So, who or what is killing change? That's what you'll find out in this witty whodunit.

The Architecture of Happiness-Alain De Botton 2010-12-03 Bestselling author Alain de Botton considers how our private homes and public edifices influence how we feel, and how we could build dwellings in which we would stand a better chance of happiness. In this witty, erudite look at how we shape, and are shaped by, our surroundings, Alain de Botton applies Stendhal’s motto that “Beauty is the promise of happiness” to the spaces we inhabit daily. Why should we pay attention to what architecture has to say to us? de Botton asks provocatively. With his trademark lucidity and humour, de Botton traces how human needs and desires have been served by styles of architecture, from stately Classical to minimalist Modern, arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks. On an individual level, de Botton has deep sympathy for our need to see our selves reflected in our surroundings; he demonstrates with great wisdom how buildings — just like friends — can serve as guardians of our identity. Worrying about the shape of our sofa or the colour of our walls might seem self-indulgent, but de Botton considers the hopes and fears we have for our homes at a new level of depth and insight. When shopping for furniture or remodelling the kitchen, we don’t just consider functionality but also the major questions of aesthetics and the philosophy of art: What is beauty? Can beautiful surroundings make us good? Can beauty bring happiness? The buildings we find beautiful, de Botton concludes, are those that represent our ideas of a meaningful life. The Architecture of Happiness marks a return to what Alain does best — taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject. As he did with Proust, philosophy, and travel, now he does with architecture.

The King Must Die-Mary Renault 2013-09-10 New York Times Bestseller: This retelling of the Greek myth of Theseus, king of Athens, is “one of the truly fine historical novels of modern times” (The New York Times). In myth, Theseus was the slayer of the child-devouring Minotaur in Crete. What the founder-hero might have been in real life is another question, brilliantly explored in The King Must Die. Drawing on modern scholarship and archaeological findings at Knossos, Mary Renault’s Theseus is an utterly lifelike figure—a king of immense charisma, whose boundless strivings flow from strength and weakness—but also one steered by implacable prophecy. The story follows Theseus’s adventures from Troizen to Eleusis, where the death in the book’s title is to take place, and from Athens to Crete, where he learns to jump bulls and is named king of the victims. Richly imbued with the spirit of its time, this is a page-turner as well as a daring act of imagination. Renault’s story of Theseus continues with the sequel The Bull from the Sea. This ebook features an illustrated biography of Mary Renault including rare images of the author.

Rogue Economics-Loretta Napoleoni 2011-01-04 What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China’s fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

The Future of the Classical-Salvatore Settis 2006-10-20 Every era has invented a different idea of the 'classical' to create its own identity. Thus the 'classical' does not concern only the past: it is also concerned with the present and a vision of the future. In this elegant new book, Salvatore Settis traces the ways in which we have related to our 'classical' past, starting with post-modern American skyscrapers and working his way back through our cultural history to the attitudes of the Greeks and Romans themselves. Settis argues that this obsession with cultural decay, ruins and a 'classical' past is specifically European and the product of a collective cultural trauma following the collapse of the Roman Empire. This situation differed from that of the Aztec and Inca empires whose collapse was more sudden and more complete, and from the Chinese Empire which always enjoyed a high degree of continuity. He demonstrates how the idea of the 'classical' has changed over the centuries through an unrelenting decay of 'classicism' and its equally unrelenting rebirth in an altered form. In the Modern Era this emulation of the 'ancients' by the 'moderns' was accompanied by new trends: the increasing belief that the former had now been surpassed by the latter, and an increasing preference for the Greek over the Roman. These conflicting interpretations were as much about the future as they were about the past. No civilization can invent itself if it does not have other societies in other times and other places to act as benchmarks. Settis argues that we will be better equipped to mould new generations for the future once we understand that the 'classical' is not a dead culture we inherited and for which we can take no credit, but something startling that has to be re-created every day and is a powerful spur to understanding the 'other'.

Moving Millions-Jeffrey Kaye 2010-04-06 On the same day that reporter Jeffrey Kaye visited the Tondo hospital in northwest Manila, members of an employees association wearing hospital uniforms rallied in the outside courtyard demanding pay raises. The nurses at the hospital took home about \$261 a month, while in the United States, nurses earn, on average, more than fifteen times that rate of pay. No wonder so many of them leave the Philippines. Between 2000 and 2007, nearly 78,000 qualified nurses left the Philippines to work abroad, but there’s more to it than the pull of better wages: each year the Philippine president hands out Bagong Bayani ("modern-day heroes") awards to the country's "outstanding and exemplary" migrant workers. Migrant labor accounts for the Philippines' second largest source of export revenue—after electronics—and they ship out nurses like another country might export textiles. In 2008, the Philippines was one of the top ranking destination countries for remittances, alongside India (\$45 billion), China (\$34.5 billion), and Mexico (\$26.2 billion). Nurses in the Philippines, farmers in Senegal, Dominican factory workers in rural Pennsylvania, even Indian software engineers working in California—all are pieces of a larger system Kaye calls "coyote capitalism." Coyote capitalism is the idea—practiced by many businesses and governments—that people, like other natural resources, are supplies to be shifted around to meet demand. Workers are pushed out, pulled in, and put on the line without consideration of the consequences for economies, communities, or individuals. With a fresh take on a controversial topic, Moving Millions: Knocks down myth after myth about why immigrants come to America and what role they play in the economy Challenges the view that immigrants themselves motivate immigration, rather than the policies of businesses and governments in both rich and poor nations Finds surprising connections between globalization, economic growth and the convoluted immigration debates taking place in America and other industrialized countries Jeffrey Kaye is a freelance journalist and special correspondent for the PBS NewsHour for whom he has reported since 1984, covering immigration, housing, health care, urban politics, and other issues What does it all add up to? America’s approach to importing workers looks from the outside like a patchwork of unnecessary laws and regulations, but the machinery of immigration is actually part of a larger, global system that satisfies the needs of businesses and governments, often at the expense of workers in every nation. Drawing on Jeffrey Kaye’s travels to places including Mexico, the U.K., the United Arab Emirates, the Philippines, Poland, and Senegal, this book, a healthy alternative to the obsession with migrants' legal status, exposes the dark side of globalization and the complicity of businesses and governments to benefit from the migration of millions of workers.

The Northern Light-A J Cronin 2016-02-01 Henry Page, owner of The Northern Light, the oldest and most respected newspaper in Tynecastle, is offered a vast sum to turn over control to a mass-circulation group based in London. He refuses – despite entreaties by his wife to accept – and so begins his fight with the Chronicle, an almost defunct newspaper in the same area which is given new life by London-thinking and London men. Against Henry Page, a journalist who believes in honest presentation of news without bringing in sensationalism, the Chronicle pulls every dirty trick in the trade. And Henry, brought eventually almost to his knees, stoically holds on to his principles and The Northern Light. It is only when he has won the battle that tragedy robs him of the most important thing in his life. In the magnificent narrative tradition of The Citadel, The Stars Look Down and Cronin’s other classic novels, The Northern Light is a great book by a much-loved author.

Cutting the Fuse-Robert A. Pape 2010-10-07 Cutting the Fuse offers a wealth of new knowledge about the origins of suicide terrorism and strategies to stop it. Robert A. Pape and James K. Feldman have examined every suicide terrorist attack worldwide from 1980 to 2009, and the insights they have gleaned from that data fundamentally challenge how we understand the root causes of terrorist campaigns today—and reveal why the War on Terror has been ultimately counterproductive. Through a close analysis of suicide campaigns by Al Qaeda and other terrorist organizations in Iraq, Afghanistan, Pakistan, Lebanon, Israel, Chechnya, and Sri Lanka, the authors provide powerful new evidence that, contrary to popular and dangerously mistaken belief, only a tiny minority of these attacks are motivated solely by religion. Instead, the root cause is foreign military occupation, which triggers secular and religious people alike to carry out suicide attacks. Cutting the Fuse calls for new, effective solutions that America and its allies can sustain for decades, relying less on ground troops in Muslim countries and more on offshore, over-the-horizon military forces along with political and economic strategies that empower local communities to stop terrorists in their midst.

Nuclear War and Environmental Catastrophe-Noam Chomsky 2013-04-30 “There are two problems for our species’ survival—nuclear war and environmental catastrophe, ” says Noam Chomsky in this new book on the two existential threats of our time and their points of intersection since World War II. While a nuclear strike would require action, environmental catastrophe is partially defined by willful inaction in response to human-induced climate change. Denial of the facts is only half the equation. Other contributing factors include extreme techniques for the extraction of remaining carbon deposits, the elimination of agricultural land for bio-fuel, the construction of dams, and the destruction of forests that are crucial for carbon sequestration. On the subject of current nuclear tensions, Chomsky revisits the long-established option of a nuclear-weapon-free zone (NWFZ) in the Middle East, a proposal set in motion through a joint Egyptian Iranian General Assembly resolution in 1974. Intended as a warning, Nuclear War and Environmental Catastrophe is also a reminder that talking about the unspeakable can still be done with humor, with wit and indomitable spirit.

Percorsi: Pearson New International Edition PDF eBook-Francesca Italiano 2013-08-28 The first edition of Percorsi quickly became one of the best-selling elementary Italian texts. The new second edition features a new design, more focus on skills-development, updated cultural information and a full version of MyItalianLab. Percorsi is an introductory program that promotes the acquisition of Italian language and culture through the integration of the “5 Cs” principles of the National Standards for Foreign Language Education. Percorsi is designed to provide beginning learners with a variety of tools to develop their communicative competence in the four major language skills–listening, speaking, reading, and writing–as they acquire familiarity with Italian culture. All of the features in Percorsi have been carefully thought out to support the two key aspects of the language acquisition process: language comprehension and language production. From the start, carefully structured communicative activities based on authentic materials and texts encourage students to use Italian in everyday situations. Generous use of authentic content also offers students a chance to develop reading skills while gaining cultural awareness and understanding of Italian communities and traditions

throughout the world. In addition, each chapter explicitly promotes cultural exploration through illustrated presentations that are followed by activities facilitating comprehension and highlighting cultural comparisons. Students are encouraged to analyze and compare extremely varied aspects of Italian culture while making connections to their own experiences. MyItalianLab will be available for Fall 2011 courses.

Elementary Probability for Applications-Rick Durrett 2009-07-31 This clear and lively introduction to probability theory concentrates on the results that are the most useful for applications, including combinatorial probability and Markov chains. Concise and focused, it is designed for a one-semester introductory course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.

Highland Fling-Katie Fforde 2003-08-01 After a fight with her boyfriend, a business trip to Scotland is the perfect diversion for Jenny Porter, who works as a virtual assistant for a financial executive. Dispatched to assess a failing textile mill, Jenny instead finds herself determined to save it at any cost after befriendng its charming employees. That cost might just be her sanity as she stretches her resources, patience, and compassion to the outer limits. As she gets to know the colorful Dalmain clan, Jenny just can't say no when asked to help run a mobile food stand, save the family business, put an overbearing matriarch in her place, rekindle an old romance, or throw a dinner party for sixteen on short notice. Then there's the problem of being attracted to the dashing yet abrasive Ross Grant, who has a way of showing up just when things seem almost sane and manageable.. The majestic Scottish highlands, covered in purple heather and dotted with sheep and llamas, provide a dramatic backdrop while Jenny tries to pull everything together in time to save the mill and figure out her increasingly complicated personal life, in this delightful, romantic romp.

The Atomic Bazaar-William Langewiesche 2008-04-29 In his shocking and revelatory new work, the celebrated journalist William Langewiesche investigates the burgeoning global threat of nuclear weapons production. The Atomic Bazaar is the story of the inexorable drift of nuclear weapons technology from the hands of the rich into the hands of the poor. As more unstable and undeveloped nations find ways of acquiring the ultimate arms, the stakes of state-sponsored nuclear activity have soared to frightening heights. Even more disturbing is the likelihood of such weapons being manufactured and deployed by guerrilla non-state terrorists. Langewiesche also recounts the recent history of Abdul Qadeer Khan, the scientist at the forefront of nuclear development and trade in the Middle East who masterminded the theft and sale of centrifuge designs that helped to build Pakistan’s nuclear arsenal, and who single-handedly peddled nuclear plans to North Korea, Iran, and other potentially hostile countries. He then examines in dramatic and tangible detail the chances for nuclear terrorism. From Hiroshima to the present day, Langewiesche describes a reality of urgent consequence to us all. This searing, provocative, and timely report is a triumph of investigative journalism, and a masterful laying out of the most critical political problem the world now faces.

Oscillations, Waves and Acoustics-P. K. Mittal 2010-01-01 The present book is meant for the students of undergraduate Science and Engineering courses. This course finds lots of applications, right from Mechanics, Sound, Optics, Solid State Physics, Electrodynamics to Electronics. The chapters cover a vast number of topics like free, forced, damped oscillations, normal modes of vibrations, sound waves, overdamped and ballistic oscillations, LCR circuits etc. In every chapter the topics are dealt with in detail followed by illustrated solved examples and unsolved exercises. Some previous experience with a Calculus course in which differential equations have been discussed is highly desirable. However, the details of the steps in arriving at final solutions are worked out in detail. The book, thus, acts like any textbook and at the same time no help book is needed for further details.

On Behalf of God-Bruce R. Reichenbach 2002-08-19 This book is part of a series - Studies in a Christian World View - that focuses on the relation of Christianity to the various academic disciplines - philosophy, psychology, economics, the arts, history, literature. The series addresses difficult questions that arise when we bring considerations derived from a specific religious worldview to bear on matters common to both Christians and non-Christians.
